

K O R O

The new Koro dispenser comes from the technology and experience of Necta, a leading brand which is well-known and respected in its field. You need only to look at it to recognise its inborn class. The soft and modern lines, products of an essential and rigorous design, emphasise its typically made in Italy class and elegance.

Aesthetic pleasure, and excellent technical value. Koro is extraordinarily compact and reliable, due to the use of the highest quality components, normally used in dispensers that support much heavier workloads.

Koro is ideal for environments such as offices, meeting rooms, stores, professional studios, small cafés and restaurants. Koro represents the ideal solution for a hot drinks service of high quality, with a menu which satisfies every taste.
